

July 12, 2017

To whom it may concern:

This letter confirms that A-LIGN has completed a Type 1 AT 101 HIPAA/HITECH examination of the 365 Data Centers' (the "Company") health information security program for the Colocation Services System, which was fairly presented and included essential elements of the Health Insurance Portability and Accountability Act Security Rule of 2003 ("HIPAA") and the Health Information Technology for Economic and Clinical Health Act ("HITECH").

The examination was completed based on the assertions made by the Company and in accordance with attestation standards established by the American Institute of Certified Public Accountants (AICPA).

The examination of management's assertions, as included in the examination report, included procedures to obtain evidence about the fairness of the presentation of the description of the controls to achieve relevant aspects of the HIPAA Security Rule for the Administrative Safeguards, Physical Safeguards, Technical Safeguards, and Organizational Requirements, and Breach Notification Procedures of HITECH. Based on our examination we have obtained reasonable assurance that the controls were suitably designed as of April 30, 2017.

Please don't hesitate to contact me if you have any questions.

Regards,

A handwritten signature in black ink, appearing to read 'Scott G. Price'.
