

July 12, 2017

To whom it may concern:

This letter confirms that A-LIGN has conducted a Type 2 SOC 2 examination of 365 Data Centers' (the "Company's") Colocation Services System. The scope of the examination included Security/Common Criteria and Availability principles.

The examination of management's assertions as included in the "Report of Management on Controls" in accordance with the AICPA Trust Services Principles and Criteria regarding Security/Common Criteria and Availability surrounding its Colocation Service System was performed to determine if the written assertion by management fairly presents the Company's environment related to the AICPA Trust Services Principles and Criteria regarding Security/Common Criteria and Availability in all material respects, and based upon criteria stated by the AICPA.

As of the date of this letter, all testing procedures related to the Company's Colocation Service System are complete. Based on our examination we have obtained reasonable assurance, in all material respects, that (1) the description is fairly presented based on the description criteria, and (2) the controls were suitably designed and operating effectively to meet the applicable trust services criteria throughout the period of May 1, 2016 to April 30, 2017.

Please don't hesitate to contact me if you have any questions.

Regards,
